**Welcome to
A-level
Geography
at CNS**

KS5 Homework, assessment and feedback

- Consolidation of classwork is nearly always in the form of an exam-style question (ESQ), to inform subsequent learning.
- Individual and whole class feedback is given to ESQ responses.
- Summative assessments take place following the sixth form calendar and semester model approach.
- Homework focusses on flip-learning and wider reading so that students are broadening their knowledge, understanding and vocabulary, ready for learning in advance.
